2023 IFFGD Travel Awards Nomination Form

Advancing the Understanding of Functional GI and Motility Disorders, and Neurogastroenterology

Note: This form must be completed and submitted by the applicant – no later than **December 15, 2022** – as the front cover to the additional supporting materials required. **Completed applications should be converted to a single PDF file and emailed to iffgd@iffgd.org**

1. Applicant Information

Name: _____

E-mail: _____

Title: _____

Affiliation/Research Setting: _____

Degree(s) held: _____

2. Meeting for which funding may be used (Select all that may apply)

<input type="checkbox"/>	Digestive Disease Week 2023
<input type="checkbox"/>	ACG Annual Scientific Meeting 2023
<input type="checkbox"/>	UEG Week 2023

3. **Applicant Request Letter:** A letter from the applicant must be included in the application package in order to be considered for one of the travel awards. The letter should include research interest of the applicant, including any achievements in the field. It should also include how the applicant feels they will benefit from attendance at the medical meeting.

4. **Letter of Support:** The letter of support should include information such as a description of research achievement; when and where the research took place; significance of the research; explanation of how the applicant’s actions have advanced knowledge in the area or basic aspects or clinical practices; and an explanation of the applicant’s role in the research.

By: _____ Title _____

Print Name: _____ Institution: _____

5. **Curriculum Vitae of the Applicant/Nominee:** (including degrees held, the years they were awarded, and the institutions that awarded them.)

These travel awards are intended to encourage the participation of young clinicians and scientists in multidisciplinary efforts aimed at advancing the understanding of functional gastrointestinal and motility disorders, and neurogastroenterology. To be eligible, the investigator must have an MD, PhD or equivalent and have completed their highest level of training no more than seven years prior to nomination. They should also have demonstrated a record of accomplishment, and be currently active in investigating basic, translational or clinical aspects of functional GI or motility disorders, or other neurogastroenterology topics.
